

CSL Research Acceleration Initiative

Applications close 30th September, 2019

CSL and the University of Bern, Inselspital and sitem-insel wish to establish new collaborative partnerships to accelerate research. To celebrate the establishment of the CSL Behring Biologics Research Center within sitem-insel, a call for Research Proposals is being announced.

Eligibility: Researchers/clinicians employed by the University of Bern, Inselspital and sitem-insel working in a Therapeutic Area and a Focus Area and/or Modality listed below.

Visit <https://www.cslbehring.ch/RAIBern> to download the application form, and submit by Monday 30th September, 2019.

THERAPEUTIC AREAS

- Immunology
- Neurology
- Haematology
- Thrombosis
- Transplant
- Respiratory
- Cardiovascular /
Metabolic

FOCUS AREAS

- Novel drug targets
- Clinical sample and/or clinical data collaborations
- Novel platforms or technologies relevant to CSL Therapeutic Area or Modality
- Novel delivery strategies and enhancements for biologics, gene or cell therapies
- Biomarkers of disease
- New uses for CSL's pipeline or on-market products

MODALITIES

- Antibodies
- Protein therapeutics
- Gene therapies
- Cell therapies
- Small molecules **not** of interest

WHY COLLABORATE WITH CSL?

Collaborate with one of the world's leading biopharmaceutical companies

Global capabilities on your doorstep

Access to commercial R&D, clinical, intellectual property, marketing and manufacturing expertise

Accelerate translation of your research to deliver new **life-saving therapies** to patients

Funding for successful proposals

For further information, please visit the link above.

Alternatively, you can email samuel.hou@cslbehring.com and/or attend the **information session on Monday 9th September**, 16.00 hrs at sitem-insel, Freiburgstrasse 3, 3010 Bern.
